

PROGRAM CATALOG

Temen Copilot Academy - Program Catalog and Buyer Guide

Choose the right Temen program for exam preparation, Microsoft 365 foundations, organizational Copilot adoption, planning, applied Chat learning, or executive alignment.

BUYER GUIDE

Signal Blueprint and Microsoft 365 Copilot visual system | Version 2.0 | August 5, 2026

Choose the learning condition before choosing the course code.

Temen separates exam readiness, Microsoft 365 foundations, organizational adoption, strategy, applied Chat learning, and executive alignment so the buyer can use the smallest program that fits the condition today.

AB-900

AB-900 Copilot and Agent Administration Exam Readiness

One instructor-led day. Prepare technical learners to understand Microsoft 365 administration, Copilot, agents, permissions, governance, security, and responsible operation.

AB-730

AB-730 AI Business Professional Exam Readiness

One instructor-led day. Help business professionals identify valuable AI scenarios, connect them to business processes, and form credible outcome and investment proposals.

AB-731

AB-731 AI Transformation Leader Exam Readiness

One instructor-led day. Prepare leaders to evaluate AI opportunities, guide adoption, align investment to outcomes, and champion responsible transformation with Microsoft AI services.

Adoption and supporting programs.

FOUND

Microsoft 365 Foundations Before Copilot

One instructor-led day. Strengthen how people communicate, find, store, share, analyze, and create across Microsoft 365 before asking Copilot to work across that information.

14D

Temen Copilot Academy for Organizations

Fourteen-calendar-day adoption sprint with 7.5 live hours. Combine live foundations, role sessions, agents and prompting, guided practice, office hours, resources, and moderated support in one focused adoption window.

QST

Copilot QuickStart for Organizations

One working day. Align goals, priority scenarios, readiness, governance, adoption, leadership, and the first deployment sequence.

Focused entry programs.

CHAT

Copilot Chat Applied Learning

Approximately two hours. Build practical habits for drafting, summarizing, brainstorming, grounding, verification, and responsible prompting in Copilot Chat.

EXEC

Copilot and Agent Executive Immersion Briefing

Ninety minutes. Give leaders a concise, evidence-led view of Copilot and agents, the decisions they own, and the path from interest to governed adoption.

One learner, one private cohort, or an organization volume tier.

AB-900

One instructor-led day

AB-900 Copilot and Agent Administration Exam Readiness

\$749.99 per learner. Standard capacity: up to 12 learners.

AB-730

One instructor-led day

AB-730 AI Business Professional Exam Readiness

\$749.99 per learner. Standard capacity: up to 12 learners.

AB-731

One instructor-led day

AB-731 AI Transformation Leader Exam Readiness

\$749.99 per learner. Standard capacity: up to 12 learners.

FOUND

One instructor-led day

Microsoft 365 Foundations Before Copilot

\$5,250 per private cohort. Standard capacity: up to 10 learners.

14D

Fourteen-calendar-day adoption sprint with 7.5 live hours

Temen Copilot Academy for Organizations

\$850 per learner, 7 minimum. Standard capacity: up to 49 learners.

7-14: \$850 each | 15-24: \$800 each | 25-49: \$750 each

Match the unresolved decision to the program.

AB-900

Copilot administration

Choose AB-900 when the learner is responsible for supporting, securing, or administering an AI-enabled Microsoft 365 environment and needs foundational breadth before deeper specialization.

AB-730

AI business professional

Choose AB-730 when the learner must use Copilot and agents productively, responsibly, and confidently in business work without becoming an AI developer.

AB-731

AI transformation leader

Choose AB-731 when the learner must guide AI investment, capability selection, responsible adoption, and organizational change without writing code.

FOUND

Microsoft 365 Foundations

Choose Foundations when the barrier is not access to Copilot, but the quality and consistency of everyday work across Microsoft 365.

14D

Organizational Academy

Choose the Organizational Academy when the technology is available or planned, but people need a supported path from basic understanding to role-specific use and continued practice.

QST

Copilot QuickStart

Choose QuickStart when the unresolved problem is the plan: priorities, readiness, governance, adoption, owners, measures, and the first responsible deployment sequence.

CHAT

Copilot Chat

Choose Copilot Chat when learners need a practical, low-friction first experience that turns an AI conversation into a controlled work pattern.

EXEC

Executive briefing

Choose the Executive Briefing when leaders need a common view of opportunity, risk, adoption, and responsibility before approving the next Copilot or agent decision.

Choose, confirm, learn, and continue.

01

Choose

Select the program that fits the learner role or organizational condition.

02

Confirm

Temen confirms price, capacity, audience, time zone, schedule, instructor availability, delivery, accessibility, and commercial terms.

03

Prepare

Learners receive prerequisites, welcome information, safe practice boundaries, and current source details where applicable.

04

Learn

Live instruction connects concepts to applied scenarios, artifacts, and the learner's real responsibility.

05

Continue

The buyer receives completion evidence, resources, open questions, and a recommended next action.

Commercial activation boundary

Published prices and standard capacities are established. Direct checkout remains unavailable until policy, geography, tax, instructor availability, merchandising approval, and Shopify product activation are complete.
